

Dear Residents,

This circular is for information with regards to the different committees we have in the Village as so many residents asks us who is on which committee.

1. THE FOLLOWING COMMITTEES NEED MORE MEMBERS;

All tenants are very welcome to serve, please. However, as per the MOI rules, we need a letter with permission or a proxy from the owner. Please contact me and I will forward you the appropriate form.

1.1 Infrastructure and Aesthetics

Any interested resident is more than welcome to send me a paragraph or two on how you could assist us. Here we require amongst what you can offer, an eye for detail as well as an understanding what is required set out by the rules in the village under the guidance and assistance of the Chairman. Don't think you are not equipped, we can ALL make a difference. Add some common sense and enthusiasm to the list above and we look forward to hearing from you, please!

1.2 Communications Committee

We need members who can look at all levels of communication, committee newsletters, and very important are the emergency communications - warning of power outages, criminal activity etc. Communication is vitally important to the peace of mind, kept up to date and peace of mind of the residents.

Newspaper

We need your help to get this Newspaper up and running, PLEASE. Otherwise we cannot do this. Every little bit will help to avoid a few members being overloaded and throwing in the towel after a few months which we can ill afford. The Newspaper is not only about writing. There are a collection of small, easy and fun tasks that you can assist with. We need at least 6 or more enthusiastic residents (owners and or tenants) and others who can assist in a less involved role, that are willing to assist in writing, editing, interviewing, researching, continually suggesting fresh and exciting ideas, advertising bookings, distribution to post boxes, emailing, collecting from printers, etc. They don't have to meet regularly but it will be required from time to time and it will be great fun. Our own creation coming to fruition! This Newspaper will be available on a monthly basis and full of interesting history of the village, people living in the village, tips and creative ideas, educational legal, food and health articles pertaining to ORV. These are just ideas, not cast in stone. The list is endless. You do not require a computer for most of the tasks, depending on your input. We need enthusiasm; that is all. Any related skills will be a plus.

1.3 Security Committee

The security committee needs more members as well. Living in a secure village is one of the first reasons why most people have moved here and you can help make a massive difference by assisting with the continual maintenance and checking of all systems, always needed. If you have any skills and a tad of common sense to help make a difference, please email or call me.

1.4 Legal, Compliance and Administration

This committee requires input from residents with a basic knowledge of legal principles (allowed by law) and statutory requirements (regulated by law). They will be able to give input with regards to contracts, operations and the MOI. This committee will also scrutinize contracts of smaller service providers and following the Procurement procedure and give feedback to the procurement committee. The residents who would like to join this committee need to have time available, not necessarily only for meetings but also in preparation of meetings that can be done at home as it is a time consuming but vitally important task: Once the MOI is registered, it is a very costly and time-consuming exercise to amend and re-register, so we need to get it right first time! The Director overseeing this committee is Kobus van Loggerenberg.
